

Simply ask:

You talk, your home responds. Our truly intelligent solution provides conversational voice interaction that's so easy to use, you'll wonder how you ever lived without it.

"Alexa, dim the lights to 50%."

Dear Home Owner,

We'd like to congratulate you on your new truly intelligent home.

Your Quantify qDevices enable you to control your lighting via touch from your button glass touch panels or by voice, using the Alexa voice assistant.

To set up and connect your Echo DOT smart speaker to your home with Alexa, you require an account with Amazon and an account with Quantify. Linking the accounts enables Alexa to control your lighting.

How to voice enable your home and connect Alexa with your qDevices:

1. Please make sure **your home is connected to the NBN** before you begin.
2. On your mobile phone, search for and **download the Amazon Alexa app**.
3. Start the Amazon Alexa app and **create your amazon account**.
4. **Setup Echo Dot** by following the prompts in the Amazon Alexa app.
5. Navigate to skills and **search for the Quantify skill** in the Amazon Alexa app. Tap to **enable the Quantify skill**.
6. Sign Up to Quantify to link your qDevices with the Amazon Alexa Dot.

Now you can start using Alexa and ask things like:

Alexa, what's the news?

Alexa, will it rain today?

Alexa, set a timer for 6 minutes.
